

LUGGAGE DIMENSIONS

Air freight

The company travels with six hold bags (5 x 23 kg as follows: two standard suitcases, three sports equipment cases) and two cabin bags (2 x 12 kg).

Travel by public transport or private vehicle:

The company travels with:

- two large suitcases
- two small suitcases
- one very large sports bag (50 cm x 60 cm x 100 cm) which ***must not be squashed*** (delicate contents) – **this can be a problem for bus travel where cases and bags are often squeezed into the boot**
- two ski sports bags, 180 cm and 200 cm long – this can be a problem for travel by private car, as they do not fit easily into the interior. **The best option is to use a large vehicle equipped with a roof rack, or a minibus.**
